elo - WES is an authorized Elo Touch Solutions distributor.

light pc stand - interactive info terminal & monitor stand

Thanks to the shape, you have a clear view of the objects behind it, such as a machine or a production line. The stand offers good stability. It is possible to screw the stand to the floor. The cable management takes place inside the column. Lockable storage space for a Mini-PC is located at the base of the stand.

+ optimum operating height
& monitor tilt of 35°
for touch applications

+ complete cable management
in the column

+ lockable
Storage space
for Mini-PC

+ high stability,
bottom screwing possible
