elo

Collaboration Tray

For Elo IDS Products

Easy to Install

USB Ready

3rd Party Software Compatibility

Product Overview

Stop struggling to find the USB port on the back of the monitor or trying to draw on the presentation screen with a mouse – starting collaborating with Elo. The new Collaboration Tray paired with an Elo touchscreen simplifies team work for enterprise applications. Designed for use with our IDS product line, the Collaboration Tray is compatible with any third-party corporate or education collaboration software solution - transforming the IDS display into a Collaboration Hub via the open platform architecture of our IDS products.

The tray kit includes two styluses optimized for use with Elo's PCAP and IR touchscreens across a variety of interactive white board and annotation applications. Also, included in the tray is a front access USB port for direct and immediate content sharing from any member of the meeting when paired with an Elo embedded computer module (ECM). Additionally, the menu button enables easy source selection for toggling between inputs such as an ECM, a video conferencing system or meeting attendee's computers. A power standby indicator light is also included to help users know the touchscreen is ready for interaction.

Compatible with IDS 02-Series (3202L, 4202L, 4602L, 5502L)

Includes 2 styluses, USB port, menu button and power standby indicator light
